Perfectly matched for unmatched elegance
PREMIUM SOLUTIONS FOR DOORS

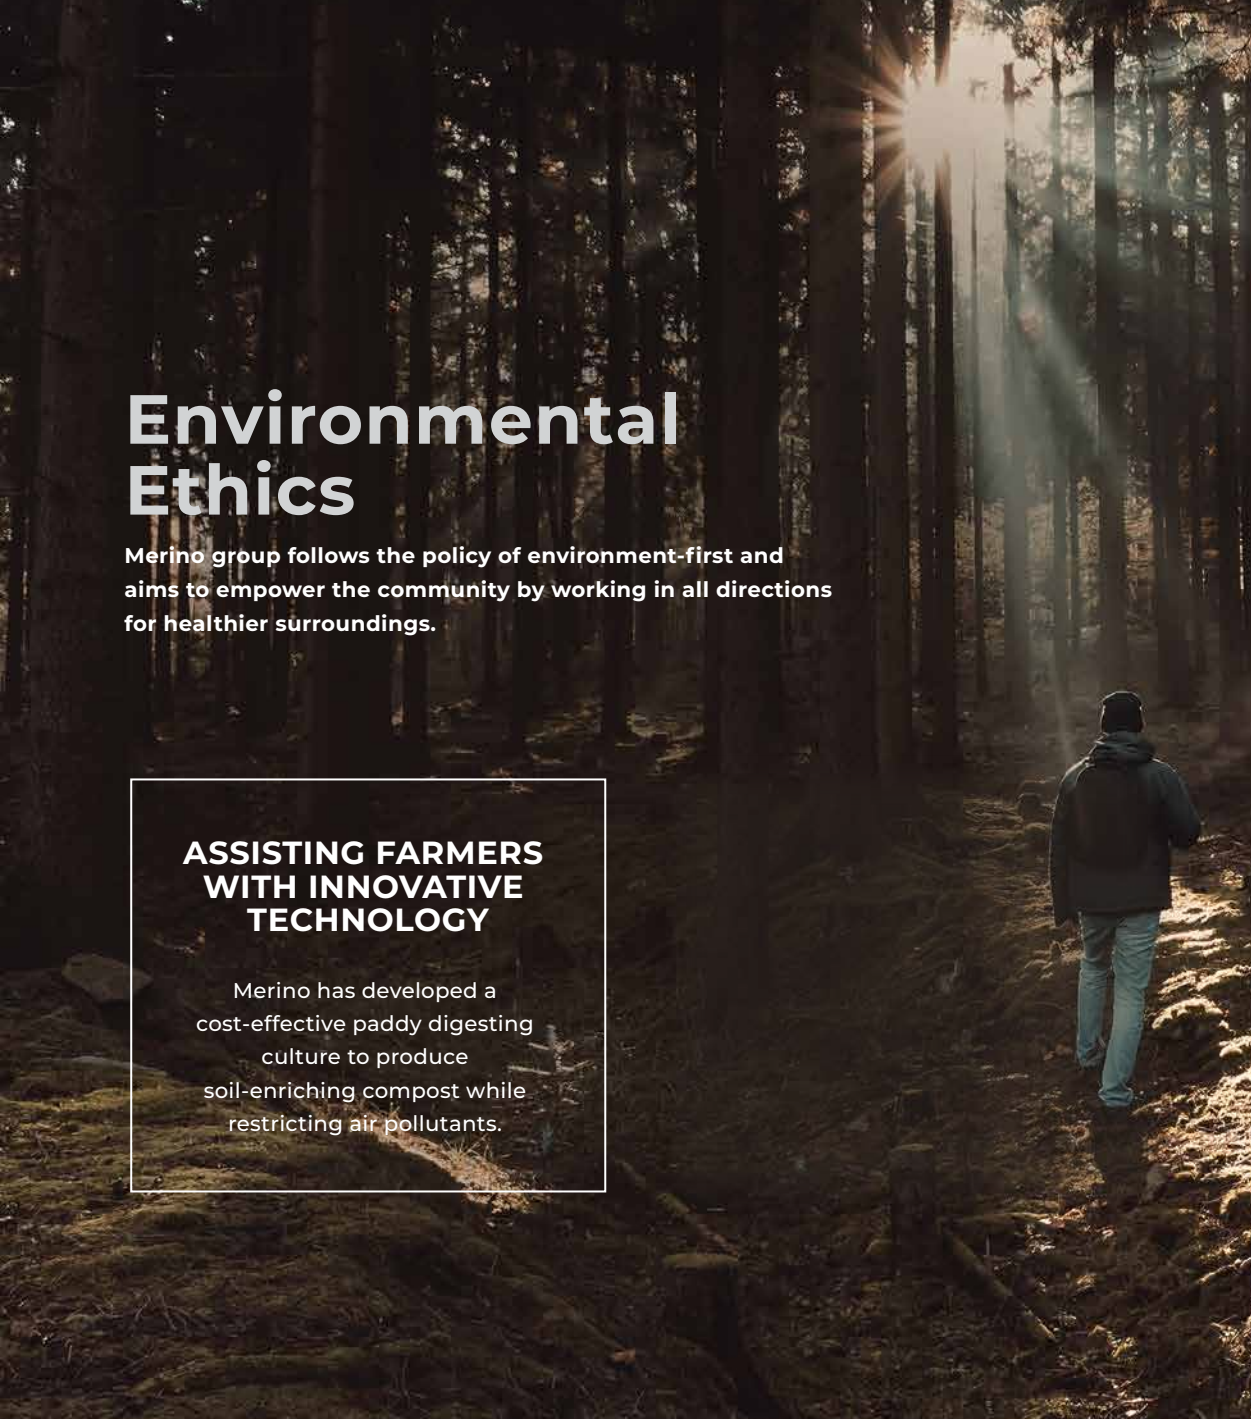

About Merino

Merino began its quest to make a name in the surface solutions industry in the 1960s. We began with the launch of plywood and by 1981 we were producing high pressure laminates. Now, we are one of the largest manufacturers of decorative laminates and are recognised globally as a leader in the surface solutions industry .

Merino is driven by innovation clearly visible in our range of products that have limitless possibilities in terms of patterns and designs. As our network of stakeholders keep growing, we look forward to a future of excellence driven by innovation and our committment to the environment and our stakeholders.

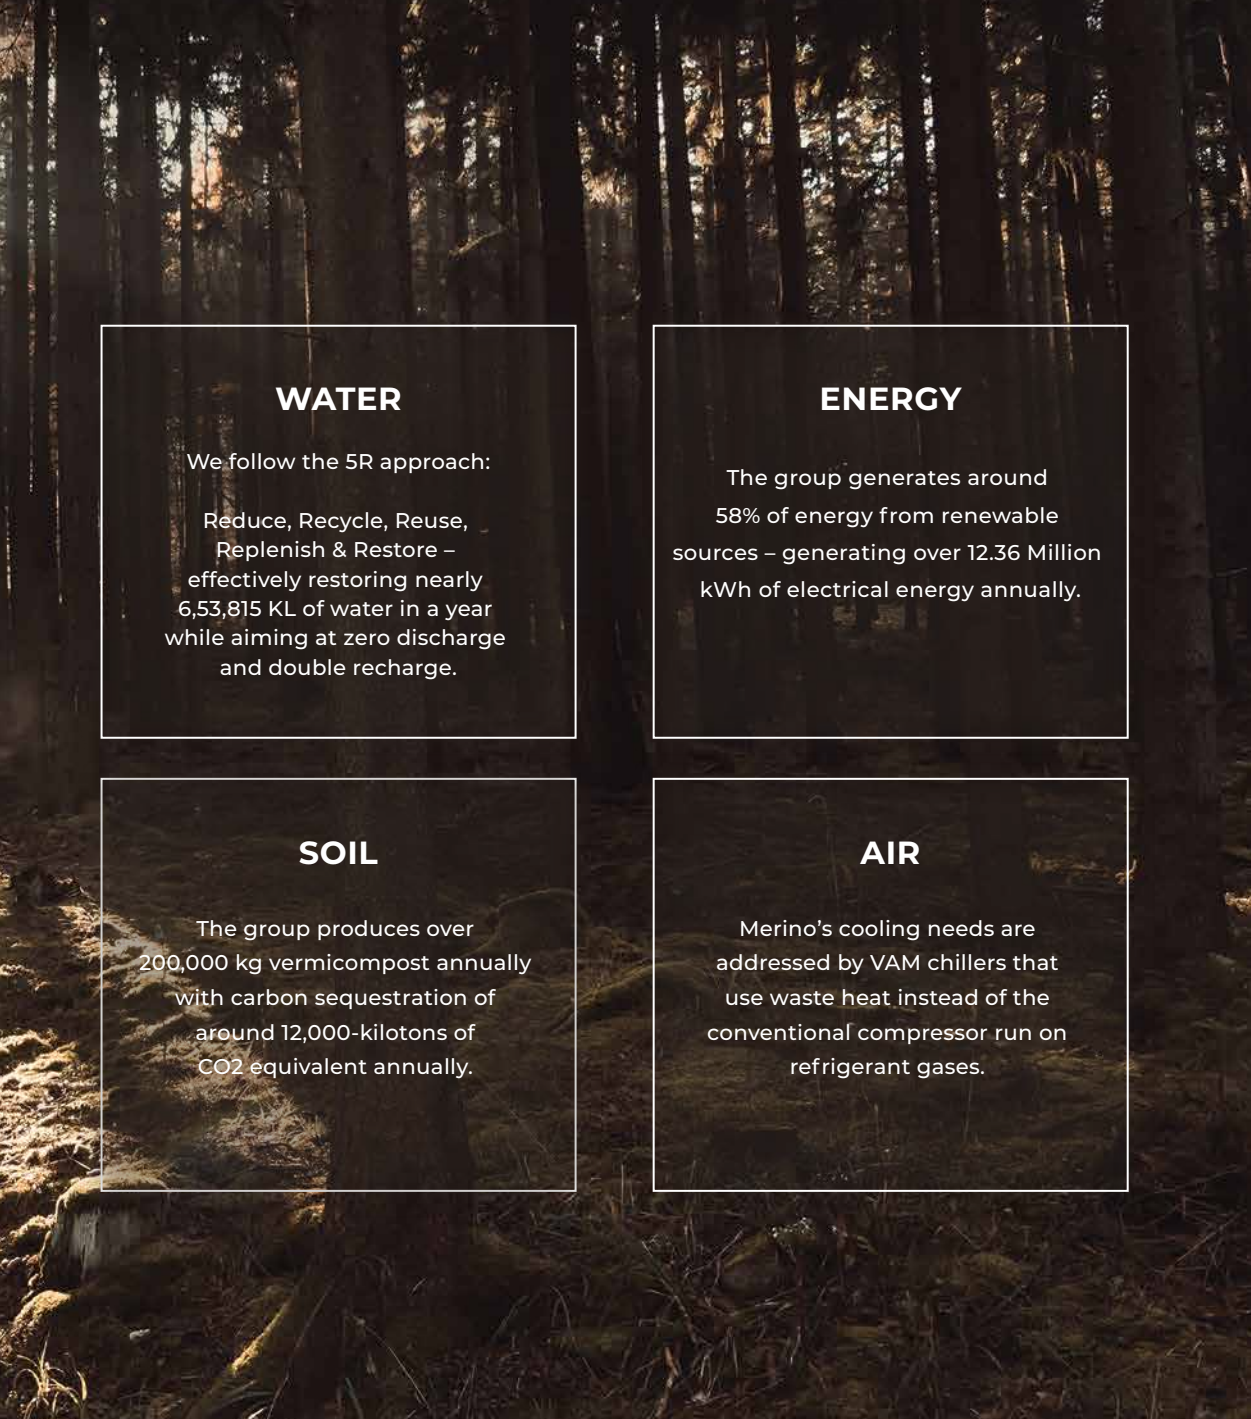

Environmental Ethics

Merino group follows the policy of environment-first and aims to empower the community by working in all directions for healthier surroundings.

ASSISTING FARMERS WITH INNOVATIVE TECHNOLOGY

Merino has developed a cost-effective paddy digesting culture to produce soil-enriching compost while restricting air pollutants.

WATER

We follow the 5R approach:

Reduce, Recycle, Reuse, Replenish & Restore – effectively restoring nearly 6,53,815 KL of water in a year while aiming at zero discharge and double recharge.

ENERGY

The group generates around 58% of energy from renewable sources – generating over 12.36 Million kWh of electrical energy annually.

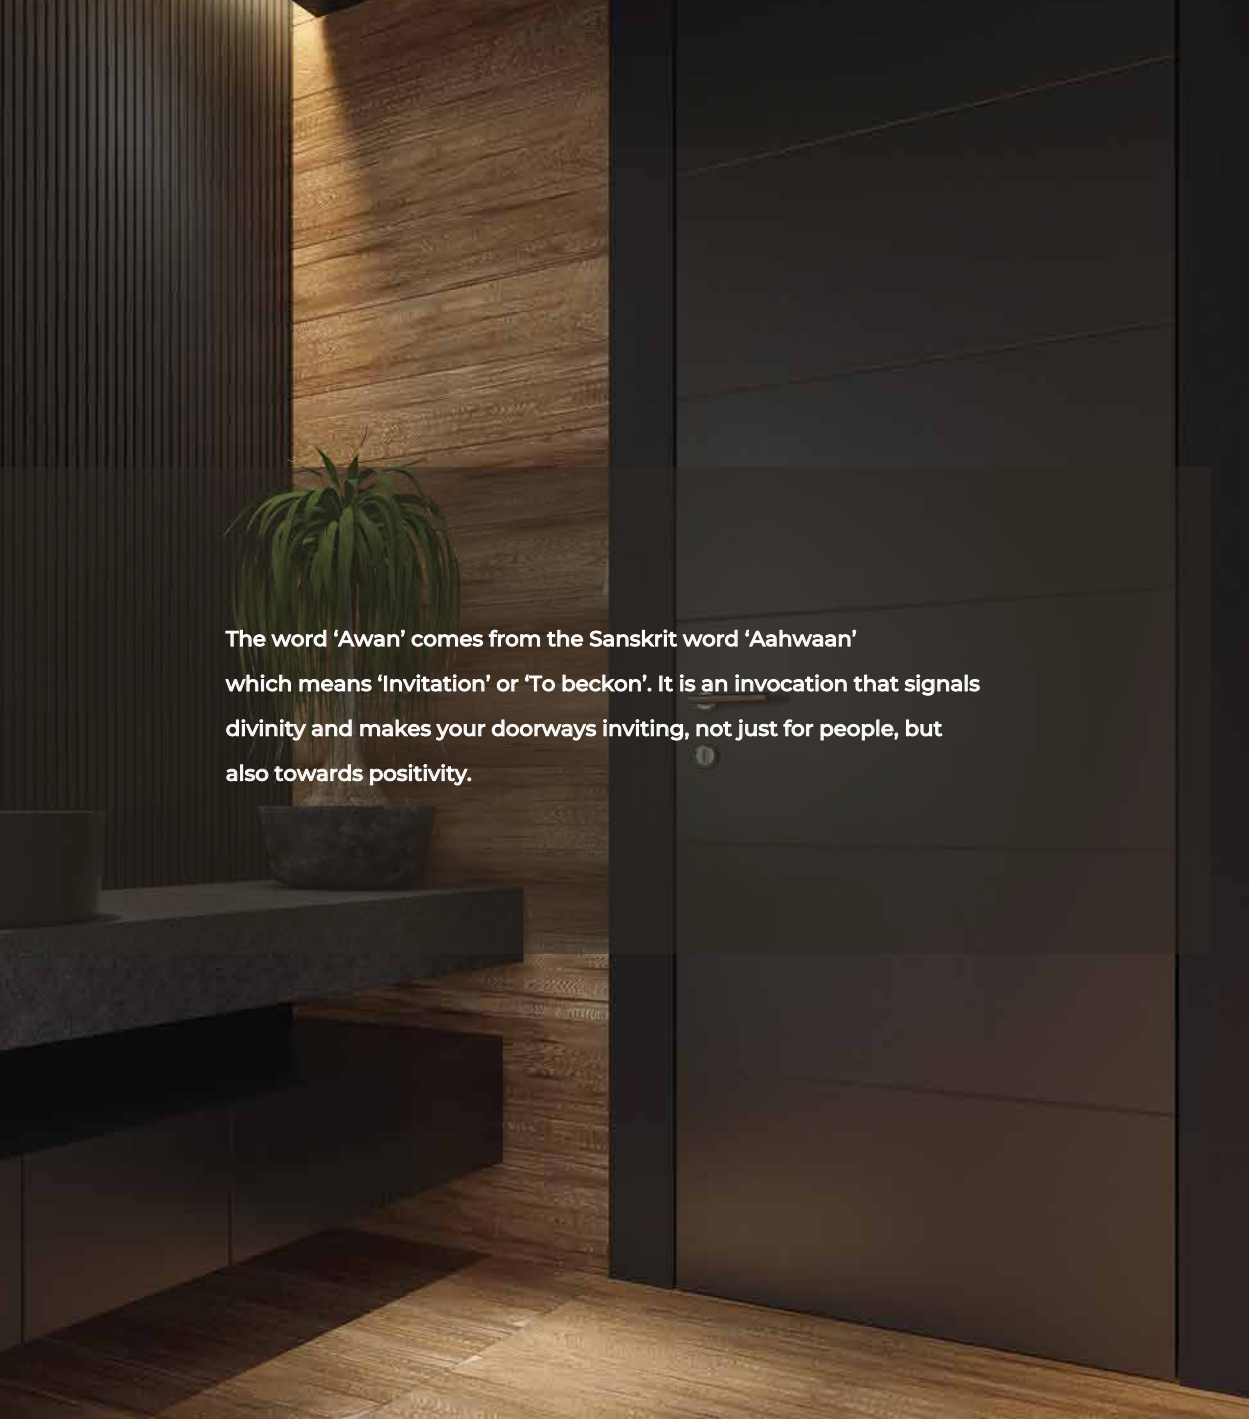

SOIL

The group produces over 200,000 kg vermicompost annually with carbon sequestration of around 12,000-kilotons of CO_2 equivalent annually.

AIR

Merino's cooling needs are addressed by VAM chillers that use waste heat instead of the conventional compressor run on refrigerant gases.

awan
Perfectly matched for unmatched elegance

The word ‘Awan’ comes from the Sanskrit word ‘Aahwaan’ which means ‘Invitation’ or ‘To beckon’. It is an invocation that signals divinity and makes your doorways inviting, not just for people, but also towards positivity.

The Awan Elements

Awan door skins & frames from the house of Merino have three key components that combine to form Awan door solutions – Architrave, Jamb, and Stopper. Each of them is carefully picked and tested to provide co-ordinated and comprehensive product performance.

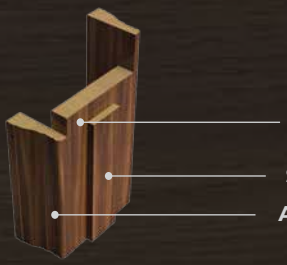

Our Architraves are available in ***Ogee*** - a classic English style that's timeless; ***Torus*** - a traditional style that exudes strength; and ***Bullnose*** - a modern design that complements clean and spacious interiors.

These components can be bought with the frame or separately which means one has limitless possibilities while creating a door solution that suits them best and blends with the aesthetics of their home.
